

Town of Danvers Electric Division

EV Level 2 Charging System \$300 Rebate Application (updated 1/29/2020)

To promote the adoption of Electric Vehicles and associated infrastructure in the Town of Danvers, Danvers Electric Division will offer a rebate program for residential electric vehicle charging station equipment and installation. Danvers Electric Division's EV Level 2 Rebate Program offers electric vehicle (EV) owners \$300 for installing some or all components of a Level 2 charger system that enables higher speed charging of an EV at your home. A Level 2 charging system consists of a 240-volt wiring circuit from your house electrical panel to a NEMA 14-50 outlet or to a home EV charging station.

Rebate Policy & Requirements

The rebate may be used to reimburse a licensed electrician's services and/or electrical and charging equipment/materials, in order to install one or more of the following charging system components: **(1)** a 240-volt wiring circuit with a 50-amp circuit breaker, **(2)** a NEMA 14-50 240V outlet, **(3)** a Level 2 charging station.

To qualify for a rebate, you must:

1. Provide invoice for charging equipment **and/or** electrician's invoice. The addresses listed on documents must match the applicant's service address associated with the DED account number on this application.
2. Provide your MA vehicle registration for your BEV (fully electric) vehicle or PHEV (gas/electric hybrid).
3. All installed equipment needs to be inspected and approved by the Danvers' Electrical Inspector. Provide an approved electrical inspection document issued by the Danvers' Electrical Inspector.
4. Submit photocopies or scans of all documents. No photos, please.
5. Applications must be submitted within one year of any invoices that you provide.
6. One rebate allowed per registered vehicle in Danvers.
7. Understand that Danvers assumes no liability for any equipment, installation or damages & may inspect purchases to verify the above information up to one year after receiving the rebate application.
